RESEARCH EXPERIENCE

- 2007-2008 Smoothbeam Laser Treatment for Axillary Hyperhidrosis. Primary investigators, Alison Stallings, MD, Alan Lewis, MD, Tulane University School of Medicine, New Orleans, LA.
- 1997-1998 Characterization of calcium permeable cation channels formed by Alzheimer's Disease associated Amyloid β protein (A β). Primary investigator, Timothy Lockwich, Colgate University, Hamilton, NY and NIH, Bethesda, MD.
Results have utility for studying the early membrane phospholipid rearrangements that are a feature of the apoptotic process occurring in individuals affected with AD, and could facilitate the design of amyloid-inhibiting therapeutics.
